

Artificial Intelligence & Cybersecurity (AICS) National Policy Implementation Framework

EXPLORING	PLANNING	REGULATING	BUILDING	PARTNERING	MONITORING
					
Setting the Stage for Policy Implementation	Crafting a National Vision	Establishing Laws & Guidelines for Secure Adoption	Strengthening the Nation's Expertise	Fostering Public-Private Partnerships	Ensuring Continuous Improvement
The nation is reviewing other national policies, existing use cases, and similar nations successes and failures in policy implementation.	The nation begins developing their draft policy and strategy to incorporate AI. This could be a new strategy/policy document or revising/enhancing existing policies.	The nation establishes laws, guidelines, regulations, and other legal tools that incorporate AI Adoption into cybersecurity policies.	The nation recruits and employs AI and Cybersecurity experts to support the integration and coordination of the policies.	The nation establishes public-private consortiums to ensure the most relevant and accurate and effective adoption of AI in cybersecurity policy.	The nation has completed all previous steps and establishes a continuous monitoring cadence for the policy.
